

VEDANT DESHPANDE

Backend & AI Systems Developer

Nashik, India | 9975196491 | vedant.milind.deshpande@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Backend developer who took an open-source AI automation platform from zero to 175+ GitHub stars, 100+ forks, and 40 contributors by architecting a deterministic multi-agent workflow engine supporting 5 LLM providers. Manages the project as Project Admin, shipping 12 versioned releases (latest v0.11.0), reviewing pull requests, and building production-grade systems including agent semantic memory, a RAG pipeline, and MCP protocol integration — engineering ownership most developers don't get until years into a job.

EXPERIENCE

Project Admin & Maintainer — AI Agent Automation Platform (Open Source) 2026 – Present

- Architected a deterministic multi-agent AI workflow engine (TypeScript/Node.js) with step-level input/output/success-failure tracking across LLM, HTTP, Tool, and Delay step types, growing adoption to 175+ GitHub stars, 100+ forks, and 40 contributors
- Built agent semantic memory using embedding-based retrieval with cosine similarity and threshold filtering, an Agent-to-Agent (A2A) protocol with webhook flow, a document RAG pipeline, and MCP (Model Context Protocol) integration across 5 LLM providers (Groq, OpenAI, Gemini, Hugging Face, Ollama)
- Directed contributor operations as Project Admin for Social Summer of Code (SSoC), reviewing pull requests, triaging issues, and onboarding external developers across 500+ commits
- Implemented backend security and access control including authentication, authorization and ownership validation, input validation, and middleware-based request handling
- Owned release management and product roadmap, shipping 12 versioned releases (latest v0.11.0) and maintaining documentation for self-hosted Docker deployment

Full Stack Development Intern | Unified Mentor, Oasis Infobyte, BharatIntern, TwiLearn 2023 – 2025

- Independently delivered 4+ full-stack web applications (Expense Tracker, Weather App, Music Player, CRUD systems), implementing REST APIs and MongoDB-backed data models with Node.js and Express.js
- Built authentication, session management, and responsive UI across projects using React, Bootstrap, and HTML/CSS, applying consistent patterns for CRUD operations and database integration

Freelance Web Developer | Self-employed 2024 – Present

- Delivered websites for real clients end-to-end — requirement gathering, development, and deployment — independently managing client communication, quotation generation, and post-launch maintenance

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, HTML, CSS

Backend & APIs: Node.js, Express.js, REST APIs, Authentication, Middleware, Session Management

Frontend: React, Next.js, Tailwind CSS, Bootstrap, Responsive Design

Database: MongoDB, Mongoose

AI & Automation: LLM Integration (Groq, OpenAI, Gemini, Hugging Face, Ollama), RAG, Agent Orchestration, MCP, Prompt Engineering, Workflow Automation

DevOps & Infrastructure: Docker, Docker Compose, Git, Linux (Debian), Nginx, Self-Hosting, Networking, DNS, Tailscale

Tools: Puppeteer, Playwright, GitHub Actions, PDF Generation, Browser Automation

EDUCATION

Bachelor of Computer Applications (BCA) 2026 – Present

HSC (12th), Maharashtra State Board — 72% 2026

Diploma in Computer Engineering — Sir Dr. M.S. Gosavi Polytechnic College (Discontinued) 2020 – 2023

CERTIFICATIONS

- MERN Stack Bootcamp — GeeksforGeeks, Nov 2025
- Python Bootcamp — LetsUpgrade, Nov 2024
- Node.js Assessment — LearnTubr, Jan 2025
